Purpose of the course:  
To enhance the counseling skills and conceptualization processes acquired through direct  
counseling experience, supervision and classroom interaction. The course is designed to prepare  
counselors for development as independent professional counselors. The evidence provided  
through the quality of the course requirements, demonstration of maturity, personal insight and  
professional presentation as appropriate to the counseling profession, will determine the course  
grade.  

The Counselor Education Program requires students to complete a supervised counseling  
internship of 600 hours. 240 of those clock hours must be direct service work with appropriate  
clients. The remaining 360 hours provide opportunities to gain experience in the activities that a  
regularly employed staff member in a counseling setting would be expected to perform.  

The primary intention of the counseling internship experience is to provide growing exposure  
and orientation to a relevant professional setting. The responsibility of supervision is shared  
between the university and the practicum site supervisor. The expectation of on-site practicum  
supervisors is to provide ongoing guidance and orientation to graduated relevant site  
experiences.  

Course Objectives:  
This course provides practical experience in school and community counseling for graduate  
students. Personal development and growth, consultation, ethical practice and assessment are  
also important components. Upon completion of this internship the student will:  

- be able to critique his/her own skills and development  
- be able to give and receive feedback in a professional manner  
- apply counseling skills and interventions from a variety of counseling perspectives
apply intervention skills with different populations, such as special needs and culturally diverse populations

apply consultation models and serve as a consultant in various situations make appropriate referrals
interpret assessments in the counseling process
be able to maintain case notes, summaries, and reflective assessments of the counseling process and client(s) change
develop an effective personal counseling style

**Outcome Goal of Internship Supervision:**
A goal of supervision is to help counselors learn to think about clients and their work with them, not to provide specific directives about particular client or events in therapy.

- To teach counselors to **develop and test hypotheses** in session with the client and that all interventions are based on hypotheses about the client and the therapeutic interaction.
- To assist counselors in **shifting** from a performance laden stance (“Did I do this right?”) to that of curiosity (What did I learn? Was my hypothesis confirmed or not? Do I have new information that allows me to make a new hypothesis?).
- To prepare counselors in **managing** the frustration and tension associated with the ambiguity of the counseling process.
- To facilitate the counselors’ **self awareness** and understanding with regard to their influence (directly or indirectly) on the counseling process and to develop skills in objective self reflection.
- To identify and **develop skills** not only as a counselor, but also as an advocate, educator, systems consultant, and collaborative group facilitator.

**Anticipated Performance Goals:**
- To demonstrate knowledge of developmental stage level of clients.
- To demonstrate treatment planning that matches the needs of the client.
- To provide honest feedback to themselves and their peers for increased professional awareness and development.
- To demonstrate professional risk taking in their reflection, understanding, and application of counseling skills.
- To demonstrate counseling techniques that are congruent with the working theory, quality/stage of the counseling relationship, and the needs of clients/families.
- To demonstrate ethical and professional standards consistent with the ACA ethical guidelines and the profession of counseling in the community and school settings.
- To fulfill the requirements of the course at a level of quality consistent with advanced graduate training and the counseling profession.
