01/19/16

I would like to invite your undergraduate students to our REU (Research Experience for Undergraduates) program. This will be an excellent program for Materials Science and Engineering, Physics, Chemistry, and Mechanical Engineering Majors that may be interested in conducting research in the summer and that may have an interest in pursuing graduate school in the future.

The information about this program may be found at: http://engineering.unt.edu/materials/reu/2015. The 2016 link will be available in the near future.

They could send their application directly to me by email (samir.aouadi@unt.edu).

Best Regards,

Samir Aouadi
Director of the REU Program in Materials Science and Engineering
University of North Texas

Dr. Samir Aouadi
Associate Professor
Department of Materials Science and Engineering
1155 Union Circle #305310
Denton, Texas 76203-5017
