French Friends!
Jeanine Black Professor
Mass Communications Major:

Thrill of Digital Photography

Drake Hokanson Professor
Outdoor Education & Recreation Major: Outdoor Quest!
Eric Barnard, Professor
EDU-TAINMENT
ACTIVITIES
What was the best part about GPU?
Learning!!!
Everything
The best part is meeting new people and new friends!
And spending time with my grandma
I liked everything but that it was only two days
I liked making friends,
Taking pictures at Latch Island
You get to spend time with your grandparents
Spending time with Nana
Grandparents and the workers
It was fun and exciting/canoeing
Canoeing in the morning, dead fish in the afternoon - ew!
Sleeping and staying in a real dorm

What would you change about GPU?
Nothing! Because it’s awesome!
To rewind the whole thing and do it again
Make it longer—it is so fun.
I want to savor and cherish it forever
Make it last forever!

What are you going to tell your friends about GPU?
It was fun
I am going to tell them to come here
That it is fun, exciting, and you learn too.
It is the best thing ever and it is extremely fun.
You get to sleep in a dorm and get to learn about tons of stuff.
That I went to college and got to make telescopes
Well, I live in Massachusetts, but I would still tell my friends
they should come if they ever visit Minnesota
It’s awesome
