

WORLD CLASS

STUDENTS INVESTIGATE REAL PROBLEMS AND
FIND SOLUTIONS THAT CHANGE OUR WORLD.

When he steps into the classroom, Winona State professor Dick Jarvinen brings more than just his Ph.D. in mathematics and award-winning teaching ability.

Professor Jarvinen brings his expertise to the space program. For the last 10 years, he has worked with teams improving safety on the Space Shuttle and the Space Station, leading to improved safety on re-entries and landings.

Winona State students share his experiences every day. Professor

Jarvinen leads them beyond the textbook, as they investigate real problems and find solutions that change the world we live in.

At Winona State University, we believe in connecting knowledge with experience, and applying it in our community. The world is our classroom.

A Community of Learners Improving Our World
