Registrar: Please notify department chair via e-mail that Notification has been recorded.

*If a dean has comments on a notification, the dean shall forward the comments to the department. [Revised 7-13-11]

CURRENT COURSE DESCRIPTION

This course is designed for HERS majors, and other students enrolled in non-nursing health related majors to examine alterations in functions affecting individuals across the lifespan. The student will explore pathophysiological concepts utilizing biology, microbiology, and physiological sciences as a basis for the student approach. The scientific approach will provide a further understanding of the mechanisms of disease, and students will incorporate critical thinking skills with practical application. The course provides a comprehensive rehabilitation approach to common alterations in body systems. Students must have a good knowledge of anatomy and physiology to enroll in this course.
