Re: Request for intensive category removal

Dear GEP subcommittee members,

The Department of Geoscience is reorganizing the Oral, Writing, and Critical analysis intensives within our department. To accomplish our goals there are three course we currently list as intensives that we will either be changing them to a different intensive, or moving the intensive to another course, and therefore their existing intensive categories need to be discontinued. Below is a table listing the course name and number, the intensive category from which it is to be removed, and the last semester it should count towards the existing intensive.

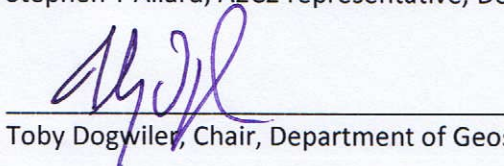

Course number	Course name	Intensive to be removed	Last semester it should count towards this intensive
GEOS 301	Field and Analytical Methods I	Writing	Fall 2013
GEOS 316	Geographic Information Systems	oral	Spring 2014
GEOS 435	Optical Mineralogy and Petrology	oral	Fall 2013

Thank you for your assistance in this matter,

Stephen T Allard, A2C2 representative, Department of Geoscience
