Total Credits: 136

General Education Courses: 43†

Music Department Courses: 65

Education Department Courses: 30

† Students should take at least two general education courses that double count for another goal area

‡ This sample degree plan also contains Ensemble and Studio courses that are often included in class schedules beyond the requirements of the degree program

This degree program prepares the student for a Minnesota K-12 Teaching License in Music with a Vocal Emphasis. This licensure allows graduates of the program to obtain a teaching position in either choral music or classroom music at all levels, kindergarten through high school. Course requirements, along with core music classes, include music teaching methods, and a series of courses offered by the education department, including student teaching at both elementary and secondary levels. Due to the stringent requirements of the state's licensure program and the need for developing skills and knowledge in both music and education, the credit requirements for this degree are higher than other programs and students usually student teach in their 5th year of study.
