Presentation Format

- Zoom webinar format
- All lines are muted - Chat function is disabled
- Questions submitted in advanced will be answered throughout presentation
Agenda

• Opening Remarks - President Scott Olson

• Minnesota Department of Health Update – Cynthia Kenyon, Epidemiologist (2:30)

• COVID-19 Safety Levels – Vice President Scott Ellinghuysen

• Self Imposed Quarantine – Health Service Director Connie Kamara

• Fall Classroom Instruction – Provost Darrell Newton

• Residence Life – Residence Life Director Paula Scheevel

• Student Sanctions – Vice President Denise McDowell and Dean of Students Karen Johnson

• WSU Employees – Lori Reed

• Campus Dashboard and Communications – Interim Vice President Andrea Northam
Opening Remarks

Dr. Scott R. Olson
President
COVID-19 Safety Levels

Scott Ellinghuysen
Vice President of Finance and Administration
Campus Safety Levels

WSU's goal is to stop the spread of COVID-19 within our campus and community. To achieve this goal, we need full cooperation among students, faculty, and staff. Only by working together can we establish and maintain the safety and health of our University. We're counting on you to protect your fellow Warriors and fight for the best college experience this fall.

The COVID-19 Campus Safety Level system is based on factors such as COVID-19 transmission rates and availability of campus resources. It also relies on guidance from the Minnesota Department of Health as well as advice from campus and local public health officials.

The WSU President’s Cabinet determines when to apply a new phase and how mitigation efforts will be implemented.

Here is a summary of the levels, corresponding actions, and some of the main indicators that inform the setting of the safety level.

Current Safety Level: Yellow

Yellow status triggers the kinds of safety measures we have already taken on our campus:

- Required face coverings
- Required daily screenings for all students, employees, and visitors
- Physical distancing in classrooms, dining centers, residence halls and other areas on campus
- Mixed in-person, hybrid, and online course delivery
- Limited on-campus events
**Low Transmission**  
Transmission levels seen as manageable

**Indicators:**  
Contacts can be identified at the time of interview and quarantined and isolated  
Isolation and quarantine <50% full  
K-12 indicators <10 cases per 10,000 over a 2-week period

---

**Medium Transmission**  
Transmission levels are beginning to tax campus resources

**Indicators:**  
Infections continue increasing over 14-day period in the county as identified in local Preparedness Plan  
>1% of campus students infected within a 14-day period  
>5% of campus cases have unknown links to another case over a 7-day period  
50-75% of your isolation and quarantine beds are full  
Routine testing capacity starting to be a concern  
Less than 14 days of PPE remaining  
Other internal metrics are of concern (e.g. increase in employees out sick)  
K-12 indicators 10-30 cases per 10,000 over a 14-day period

---

**High Transmission**  
Transmission levels have further depleted or exhausted institutional resources

**Indicators:**  
Infections continue to increase over a 2-week period after Yellow/Scenario 2 mitigation efforts put in place  
>3% of campus students are infected within a 14-day period, considering where spread is occurring  
>75% of isolation and quarantine beds are full (optimal)  
Lack of adherence to mitigation strategies  
Other internal metrics of capacity and staffing suggest additional mitigation is needed  
K-12 indicators >30 cases per 10,000 over a 14-day period

---

**Sustained High Risk**  
Transmission levels have seriously depleted or exhausted institutional resources

**Indicators:**  
Additional mitigation efforts do not improve indicators over a 2-week period

---

Minnesota State Colleges and Universities COVID-19 Planning: Transmission Levels and Indicators
### Level 1
- **Classes**: 75% classroom density, majority of classes held in person, half hybrid, quarter online
- **Workers**: Continue working from home with staggered presence in campus offices, employees with high risk health concerns consult with HR, essential workers reports as required
- **Masks and Health Screening**: Mandatory
- **Residential Halls**: Open with single-room occupancy
- **Indoor and Outdoor Events**: Capacity: 250 individuals, 6 feet physical distance maintained
- **Fitness Center**: Open limited occupancy and reduced hours, 6 feet physical distance maintained, 25% capacity not to exceed 250 people.
- **Sports**: Sports cancelled, practice allowed with distancing and following safety guidelines.
- **Dining Services & Retail**: 50% density & 6 feet distancing maintained.
- **Childcare Center**: Open
- **Isolation and Quarantine**: Contacts can be traced and quarantined, monitor isolation and quarantine bed capacity, monitoring K-12 indicators.

### Level 2
- **Classes**: 50% classroom density, third of classes are held in person, third hybrid, third online
- **Workers**: Continue working from home, staggered presence in campus offices, employees with health concerns consult with HR, essential workers reports as required
- **Masks and Health Screening**: Mandatory
- **Residential Halls**: Open with single-room occupancy
- **Indoor and Outdoor Events**: Capacity: 250 individuals, 6 feet physical distance maintained
- **Fitness Center**: Open limited occupancy and reduced hours, 6 feet physical distance maintained, capacity not to exceed 250 people.
- **Sports**: Sports cancelled, practice allowed with distancing and following safety guidelines.
- **Dining Services & Retail**: 25% density & 6 feet distancing maintained.
- **Childcare Center**: Open
- **Isolation and Quarantine**: Infection increases for 7 days on campus with unknown links, quarantine beds 50%+ full.

### Level 3
- **Classes**: Density may change based on current situation and state regulation, classes are online and hybrid
  - Only classes that have in-person requirements can be held on campus with MDH & CDC’s guidance. Requirements to meet in person must be approved.
- **Workers**: All workers working from home, except those required to be on campus
- **Masks and Health Screening**: Mandatory
- **Residential Halls**: Open with single-room occupancy
- **Indoor Events**: Cancelled
- **Outdoor Events**: 50 individuals, 6 feet physical distance maintained
- **Fitness Center**: Closed
- **Sports**: Cancelled
- **Dining Services & Retail**: Closed
- **Childcare Center**: Open for children of essential workers
- **Isolation and Quarantine**: Infection continues for 14 days on campus, mitigation strategies ineffective.

### Level 4
- **Classes**: All online
- **Workers**: All working from home except those evaluated as essential workers
- **Masks**: Mandatory
- **Residential Halls**: Possibly open, single-room occupancy
- **Indoor and Outdoor Events**: Cancelled
- **Fitness Center**: Closed
- **Sports**: Cancelled
- **Dining Services & Retail**: Closed
- **Childcare Center**: Closed
- **Isolation and Quarantine**: Mitigation efforts do not improve indicators over a two-week period. Level 3 measures implemented.
Self Imposed Quarantine

Connie Kamara
Director of Health Services
SELF-IMPOSED QUARANTINE – COVID-19

Winona State University
September 9, 2020
WSU Positive Covid-19 Case Numbers

- Accumulative since Aug 24th – 236
- Current known cases (Aug 31-Sept 6) – 209
- New cases (Aug 31 – Sept 6) - 121
WSU Students in Isolation

**Total in Isolation 271**
- Isolation on Campus – 16
- Isolation from on Campus to elsewhere – 26
- Isolating off campus - 229
WSU Students Quarantining

**Total Quarantining 169**

- Quarantining on campus – 66
- Quarantining from on campus to elsewhere – 7
- Quarantining off campus – 96
Three Social Risk Factors to Weigh Out

- Interactions
- Distance
- Duration
Interactions

How Many People Are You Interacting with and How Frequently?
Interactions refer to the number of people you interact with and the frequency of those interactions.

Risk is higher if you are meeting with people you don’t live with, particularly if you don’t know where they have been in the last 2 weeks.
Distance

How Physically Close are you to Others?
Distance

Whenever you are 6 feet away from people your risk increases.

Especially if you’re indoors or people aren’t wearing masks.
Duration

How long are your interactions?
Duration

The longer the interaction, the higher the risk

Are you passing someone in the hallway? Or having an extended encounter or conversation?
Keep These Three Factors in Mind in all you do Day to Day

Keep yourself from being exposed
Keep yourself from getting sick
Keep others from getting sick
Allows you to tell us “NO” when we call
What is Quarantine?

Quarantine asks healthy people to stay home to avoid becoming sick.

The technical definition of quarantine is that it separates and restricts the movement of people who are in close contact of a contagious disease.

What does this mean?

1. **Stay home as much as possible.**
   Only leave your house to run essential errands such as getting groceries or other essential supplies. Limit the amount of outings for only getting essential needs such as groceries or meals. This also means not attending any in-person classes.

2. **Physical distance yourself from others.**
   Stay 6 feet apart from others while running essential errands. Stay away from others within your household. Do not invite others into your home or visit others in their home.

3. **Wear a mask.**
   Wear a mask while running essential errands and in spaces where physical distancing is difficult.

4. **Wash or sanitize hands often.**
   Wash your hands for 20 seconds with soap and running water often. When hand washing is not available, use hand sanitizer with at least 60% alcohol content.

5. **Avoid touching your face.**
   Avoid touching your face, especially eyes, mouth, nose, and ears with unwashed hands. If you have glasses, this may help act as an extra barrier of protections and may help you avoid touching your face.
Know The Risk: Essential Errands

**Low Risk**
- **Delivery**
  - Ordering food with contactless delivery or cooking a meal at home.
  - Ordering packages online.

- **Pick-Up**
  - Picking up food from a restaurant or going through a drive-thru.
  - Using curbside pickup for essential shopping.

- **Outdoor**
  - Eating outdoors at a restaurant.
  - Going into a store with a mask on. Wipe down shopping cart and washing hands before entering and after leaving.

- **Indoor**
  - Eating indoors at a restaurant or drinking at a bar.
  - Going into a store without a mask on.

**Moderate Risk**
- **Delivery**
  - Pumping gas with mask on. Wipe down the gas pump before and after use, and pay at the pump.

- **Pick-Up**
  - Pumping gas with mask on. Wipe down the gas pump before and after use, and pay at pump.

- **Outdoor**
  - Using the pharmacy drive-thru to get medication.

- **Indoor**
  - Going into the pharmacy with a mask on to get medication.

**Higher Risk**
- **Delivery**
  - Using online banking whenever possible. Several banks have apps that let you make transfers and deposit checks.

- **Pick-Up**
  - Using bank ATMs. Wipe down the machine and buttons before and after use, and wash or sanitize hands after returning home.

- **Outdoor**
  - Going through a bank drive-thru—wiping down canister and sanitizing hands after leaving.

- **Indoor**
  - Paying in person with cash.

**Highest Risk**
- **Delivery**
  - Paying for your items virtually through an online shop or order.

- **Pick-Up**
  - Paying in person with a contactless card—sanitizing hands after payment.

- **Outdoor**
  - Paying in person with a card using the keypad and sanitizing hands after payment.

- **Indoor**
  - Paying in person with cash.

What should I do if...
I’ve been in close contact with someone...

- ...who is being tested?
  Be extra aware and mindful while waiting for their results, in case of need to quarantine

- ...who has tested positive for COVID-19?
  Quarantine for 14 Days since last contact, Self-Monitor AND Get Tested

- ...who is a close contact of a positive case...

- ...and IS experiencing symptoms?
  Continue to quarantine for 14 days regardless of YOUR test result

- ...but IS NOT experiencing symptoms (yet)?
  If you become symptomatic, isolate 10 days from onset of symptoms AND 24 hours fever free

- ...who has been in close contact with someone ELSE who might have been exposed?
  Continue to Practice Physical Distancing, Wash Hands, & Wear a Mask

- ...and is experiencing symptoms?
  Self-Monitor, Practice Physical Distancing, Wash Hands & Wear a Mask

Information sourced from: MIT Medical and H&WS Medical Staff

COVID Symptoms Include:
fever, cough, shortness of breath, chest pain, sore throat, loss of taste or smell, headache
Am I experiencing symptoms of COVID-19?

Quarantine
asks healthy people to stay home to avoid becoming sick.

VS.

Isolation
asks a sick person to stay home and separate themselves from others, including people in their household.

No

Have I been in close contact with someone who has symptoms?

No

Practice Physical Distancing, Wash Hands & Wear a Mask

Yes

Self-quarantine for 14 days and monitor symptoms, it may take up to 14 days for symptoms to appear after exposure.

Stay home as much as possible. Use online services to get essential needs. If you need to go out into public, wear a mask, stay 6 feet apart, don’t touch your face, and wash your hands often.

No

Did I develop symptoms during my 14 days of quarantine?

Yes

Students call Ask-A-Nurse & Employees call your local clinic and go in to get tested. Do not use public transportation or rideshare to get to the clinic.

If you have symptoms, please isolate for 10+ days since the onset of symptoms AND until you are fever-free for 24 hours without using fever-reducing medication.

COVID Symptoms Include:
- fever, cough, shortness of breath, chest pain, sore throat, loss of taste or smell, headache

Health & Wellness Services
507.457.5160

Information sourced from: CDC, MDH, and H&W Medical Staff

WHILE IN ISOLATION...
- Stay home and do not go out into public
- Stay away from people in your home as much as possible
- Wear a facemask during every interaction with your care taker
- Avoid sharing personal household items such as bedding, towels, and dishes

Q: Many regions of the US are moving up influenza immunizing because of COVID. Does WSU plan to do this for students, faculty and staff or do you recommend going through health care providers such as Winona Health now?

A: We do have flu shots available for our students. They will be available later this month. Students can call to make an appointment or can get their flu shot when they come in for COVID testing or another appointment.

We highly recommend all faculty and staff get their flu shots this year. Typically HR has worked with MNSCU and had flu shot clinics available – more info coming soon.
Q: I was tested for COVID because I was exposed to a coworker who tested positive. I have no symptoms, but the doctor’s office told me regardless of results because of the exposure I had that I remain home for the full 14 days. What is the university’s policy is towards this? I still have two courses meeting face-to-face, should I tell my professors?

A: We follow MDH guidelines which recommend 14 days quarantine and recommended testing due to exposure.

Regarding self-isolating: we do recommend listening to your doctor and quarantining for 14 days, and you can always call our Ask-A-Nurse message line at 507-457-2292 for further information. For the most up to date information, please refer to the FAQs on the health services site https://www.winona.edu/healthservices/health-alerts.asp.
Q: If a student is tested and tests negative, they can stop quarantine, correct?

A: NO— a negative test does not release you from quarantine. You must remain in quarantine for the full 14 days as symptoms may develop.
Q: I am a WSU student, and I am supposed to go home next weekend but wanted to get tested to be on the safe side and not bring anything home to my family. Does WSU offer any on campus testing for COVID-19? If so, how long do test results take and how does the process work. Will they test me with no symptoms and no known exposure?

A: Asymptomatic testing is currently not recommended by MDH and therefore not offered on campus. We do testing for those who are symptomatic or have been exposed to a positive case. We do appreciate your caution, but recommend people not go back and forth unless absolutely necessary.
Q: Yesterday evening a student in one of my online classes sent me an email stating that he has symptoms and has been tested at Winona health and attached a note from Winona health. "I just got testing today and have numerous symptoms and need to quarantine for 10 days starting today." I encouraged him to self-report and gave him the link to do so. Is there anything else I should do? Obviously, we need to protect his privacy.

A: The student should definitely fill out the self-report form. I also recommend they reach out to Ask a Nurse at 507-457-2292 for further guidance and recommendations specific to their needs.
Q: I’ve recently been feeling under the weather that last day or so. I see slight signs of COVID-19 with shortness of breath and a slight cough. I was wondering if I could come in and get tested soon. How soon is too soon to come in, and how long is too long to wait?

A: We encourage anyone experiencing COVID-19-like symptoms to call our Ask A Nurse Message Line at 507-457-2292 and get an appointment for testing. The sooner the better – and we ask that you isolate as soon as you start symptoms and call ask a nurse for an appointment.
Q: I took the daily assessment for COVID and read it too fast and accidentally put yes instead of no. My answer is incorrect. I have not been around anyone. What happens in this case?

A: We will not include her in our tracing list. If a mistake is made and a tracer may reach out to you, but you can explain the situation. We attempt to remove any known mistakes from our tracing list.
Q: I was recently exposed to COVID and I just got the test done today. I should have the results by tomorrow. I was wondering what I should do being that I live in East Lake?

A: Quarantine for the 14 days from the COVID contact even if you get a negative. If you get a positive, you will need to go into isolation which may require relocation.
Q: My child is on a sports team and one of the members on the team tested positive for COVID. I understand that the team is required to have the test and that they are to quarantine for 14 days. My questions is that if they test NEGATIVE, are they required to still quarantine for the 14 days? Why are they forcing asymptomatic students to have the test and the expense on top of that? Winona Health is doing a blood test for immunity to COVID at a lower cost. Why are we not putting that in place so that whoever is immune will not have to be tested again?

A: Yes, an exposed individual is still expected to quarantine. MDH recommends all individuals exposed to a positive contact quarantine for the full 14 days even if they test negative. Testing contacts is very important as many asymptomatic contacts have tested positive. There is an antibody test available for COVID-19, but it is not recommended as it is yet known how long a person retains COVID antibodies in their system to be able to say for certain this demonstrates any long-term immunity to the virus.
Q: I was wondering where the swabs go to get tested - if it is done on campus or at Winona Health?

A: After you have been tested through the Health and Wellness Services – the swabs go to Winona Health for processing and they send it to Mayo for the final processing.
Q: I have been tested and waiting for results. If it comes back negative, and I have no symptoms, do I still need to quarantine/isolate?

A: While awaiting test results you should be in quarantine. Even if the results are negative/you have no symptoms, current MDH guidance is to continue quarantining.

All close contacts should follow a 14-day quarantine period. Even if the result is negative, these contacts should continue to quarantine for a full 14 days after last exposure and monitor for symptoms; infection could develop at any time during the quarantine period.

https://www.health.state.mn.us/diseases/coronavirus/hcp/eval.html

Please follow add’l directions from your healthcare provider.
Q: I failed the health assessment today and have COVID symptoms. I will quarantine until I get tested at WSU Monday. I called my provider and they said I need to get tested. Is the test free? Do I need an appointment? What time does the testing site open?

A: Hours are MWF from noon to 2pm, and you’ll need to make an appt. Other testing times may be available other days or times. Please call to get scheduled.

Ask-a-Nurse Message Line: 507.457.2292
Email: askanurse@winona.edu

Most insurances cover COVID testing. If you are uninsured/underinsured or if your insurance does not cover the test – we do have financial assistance available for students that will cover the test.
Q: Hi, I have a roommate that tested positive for COVID-19. He woke up with symptoms on Monday August 24 and got tested that same day. His results came back positive on Wednesday August, 26. He has informed us that his quarantine ends tomorrow September 3. I feel this is not correct and too early and I am concerned for me and my roommates’ health. If you could please inform me with the correct information on how long his quarantine should last that would be much appreciated.

A: For people with symptoms of COVID and/or tested positive it is recommended for them to isolate for 10 days starting when their first symptoms started, so that would be tomorrow 9/4/2020 for him.

However, you being a close contact should be tested if you haven’t been already and you and the rest of your roommates should be quarantining for 14 days since 8/24/2020, that would be ending on 9/8/2020.

The quarantine is always longer than isolation because it can take up to 14 days for someone to develop COVID symptoms after they were exposed.

Everyone in the house should be staying separated from each other, wearing masks if less than 6 feet apart, and wiping down high touch areas frequently with disinfectant wipes.
Update from Minnesota Dept of Health

Cynthia Kenyon, MPH

Minnesota Department of Health
COVID-19 Higher Education Liaison
Epidemiologist Supervisor
Dr. Darrell Newton

Provost – Vice President of Academic Affairs
The 14-day period and instruction

• WSU will do a 14-day self-imposed campus quarantine starting September 8th. Again, this is temporary and not a reaction to any COVID-19 reports within our WSU community.

• Courses with face to face instruction need to either shift online or increase in-person precautions as needed until September 21st.

• This effort is overseen by Deans, and the Chairs with all necessary autonomy to our faculty.

• While there are some classes that require a face-to-face component, Chairs will document those classes and plans from faculty to keep students safe.
Q: I am a WSU Professor. Is it acceptable to wear a face shield *without a mask* while teaching? If it is acceptable to wear a face shield *without a mask* while teaching, is the proper distance from students still 6” or is it increased?

- WSU recommends the masks with windows. Shields are secondary/supplemental.

- There may be times when seeing the instructor’s entire face is important during class. There may also be students in class who would benefit from seeing an instructor’s mouth while they speak. For example, students for whom English is a second language, students who are hard of hearing or students with certain sensory issues may all benefit from the extra context of reading lips or seeing someone’s mouth while they lecture. WSU is providing cloth masks with clear plastic windows to assist with these situations. If, however, a faculty member chooses to wear a face shield during class, WSU has ordered face shields with fabric draping.

- The fabric provides some additional protection from airborne particles that a plastic-only face shield lacks. To request face masks and shields:
  - Masks are available (dean's office)
  - Clear masks will be available
  - For clear masks or face shields contact Ken Graetz (Winona), Jeanine Gangeness (Rochester)
Residence Life

Paula Scheevel

Director of Residence Life
Q: Yesterday on campus I saw a group of students playing volleyball on campus and many were watching. I saw hardly any masks and no social distancing. **Why are the RAs not enforcing the mask rules?** Volleyball is a high-risk activity ([https://blogs.winona.edu/wellness/how-to-safely-socialize-during-a-pandemic/](https://blogs.winona.edu/wellness/how-to-safely-socialize-during-a-pandemic/)). WSU needs to take this more seriously, as many classes will be hard to transfer online. Some students (like those with learning disabilities) have difficulty with online classes. It makes me think you just want our money and see an outbreak as inevitable.

• A: The volleyball nets are no longer up.
Q: I was curious to know if the printers are still available for use throughout all the halls?

A: Printers are available in all University Housing both Residence Hall and Apartments.
Q: Are there any living quarters set up on campus for positive COVID students to live in? What should be done when an off-campus house has it? What about grocery delivery?

A: Students in isolation are living at Tau Center and meals are delivered.
Q: How can we order meals to our residence? We just had a positive case in our room, and we don't have much food, so we need to figure something out soon.

A: If you have a positive case in your room, the person that is positive or symptomatic needs to move to isolation at Tau and meals will be delivered. If you are in quarantine you may go to the dining hall to pick up your meals. Any student that has been asked to go to Isolation or Quarantine (due to direct exposure) is sent a letter with a link to order meals. The meals will be delivered in isolation or may be picked up if in quarantine.
Student Sanctions

Dr. Denise McDowell
Vice President for Enrollment Management and Student Life

Dr. Karen Johnson
Dean of Students
Sanctions for Non-Compliance

Winona State University Student Conduct Code

The Conduct Code is based on mutual respect and understanding. In this community of learners, student conduct issues will be addressed with an educational approach. Sanctions will be designed as educational opportunities which promote personal responsibility.

Q: What should a student do if they know classmates of theirs are 'going out' in large groups, not social distancing, and not wearing masks? Is the University's protocol going to keep me safe while I'm in class?

A: Conduct code violations like these can be reported if you know the name(s) of the students: https://cm.maxient.com/reportingform.php?WinonaStateUniv&layout_id=2 These are then addressed by our Director of Student Conduct, Alex Kromminga.

Any large gatherings that occur off campus can, and should, be reported to the Winona Police Department. (507) 457-6302. WPD will respond, if they are able, to 1) break up the gathering and 2) will report to WSU the address of the gathering. So, if it’s determined that students do live there, again, Alex can respond with our conduct process.

We’ve been assigning Building Greeters to the busiest areas of campus each day for the past week and will continue to do so for the next two weeks. These folks are continuing the educational process—greeting people with a friendly face, while asking to see green screens (Daily Self-Assessment) occasionally and reminding those not wearing/wearing improperly about the mask requirements.
Q: I just read the news about the self quarantine for the WSU students for the next 2 weeks. If all of my child’s classes are online would it be possible for her to come home for the next 2 weeks and continue her classes online?

She is already very isolated with the other COVID restrictions and this will take it more difficult for her.

A: Per Minnesota Department of Health guidance, students are expected to quarantine on-campus vs going home to avoid the continued spread of COVID-19.

I understand this is a very challenging time for students, and our on-campus Housing team will be working to keep students connected and engaged during this time. In addition, all WSU students have access to confidential counseling services through WSU Counseling & Wellness Services. To schedule a telehealth appointment, students are asked to email counselingservices@winona.edu or call 507.457.5330 rather than coming into the office. More resources are available on the WSU Counseling & Wellness Services website.
Q: CAN STUDENTS COME HOME TO QUARANTINE?

A: MDH guidelines stipulate you should remain in Winona as part of WSU's 14-day quarantine.

• [https://blogs.winona.edu/ready-for-you/quarantine-isolation/](https://blogs.winona.edu/ready-for-you/quarantine-isolation/)

The site states:
• Do not go stay at your family home
• By returning home, you may spread COVID-19 to your family and within your home community If you do need to return home, you should weigh the risks with your family members and continue quarantining upon your arrival.
Q: Has building access changed? I need to be in the Science buildings before 8 am class and am wondering if the doors will be open or if I will need special access.

A: No, building access has not changed at this time.
WSU Employees

Lori Reed

Director of Human Resources
WSU Employees

• 14-day campus quarantine and telework
• Daily assessment – I got a red screen, now what do I do?
• Take care of yourself and others:
  • Employee Assistance Program
  • WSU-Warrior Connections Team
  • Continue to check in with others
• Keep focusing on productive communications
Q: How do we get sanitation kits and who can request them?

A: There is a work order link on the landing page of the Facilities webpage. You can use the link or send an email to facilities@winona.edu
Q: As someone who does not have a smart phone, I do the daily assessment via the WSU website. Would it be possible to have a link to the Daily Assessment on the Faculty/Staff homepage?

A: There are links to the Daily Self-Assessment on the WSU homepage, on the Faculty/Staff homepage, on the Current Students homepage, and on the upper banner that goes throughout the WSU website.
Q: Can staff get tested on campus or do they need to go to a clinic?

A: Staff can reach out to Health and Wellness Services if they have any questions or concerns regarding COVID 19 but at this time we are not offering testing to the staff. Staff and faculty should contact their primary healthcare provider for COVID-19 testing.

Quarantine & Self-Isolation

If you have been exposed to COVID-19 or tested positive yourself, it's going to be ok.

You have resources for support here at WSU, and we're going to do what we can to help you through this.

Ask-a-Nurse Message Line

Call the Ask-a-Nurse message line at 507.457.2292 if you have questions and to get advice about whether to see a doctor.

New Campus Quarantine: Sept 8-22

WSU has implemented a 14-day campus quarantine from Sept. 8-22.

The quarantine will limit all non-essential activities on campus for the next two weeks in a concerted effort to slow the spread of COVID-19.

In order for this effort to be effective, we need students to stay in Winona during this time.

We are asking that everyone take this request seriously in an effort to minimize the spread of COVID-19 and increase our chances of remaining on campus this year.

Q: With the increasing numbers on campus, how often are the COVID response levels being updated? Also, when many are testing in La Crosse, how long does it take for those cases to be received by WSU?

A: Please see information below on WSU’s COVID-19 Campus Safety Level system. WSU’s Cabinet determines when to apply a new phase and is meeting daily to review and discuss campus status.
• https://www.winona.edu/emergency/safety-levels.asp
Q: When do you update the COVID19 dashboard? Been on counts as of Aug. 25th and I’m concerned that the data is incorrect as I believe the count is much higher in terms of confirmed cases vs the 20 announced.

A: We are currently at Level 2 (Yellow) of the WSU COVID-19 Campus Safety Level system. The system is based on factors such as COVID-19 transmission rates and availability of campus resources. It also relies on guidance from the Minnesota Department of Health as well as advice from campus and local public health officials. You can view a summary of the levels, corresponding actions, and some of the main indicators that inform the setting of the safety level here: https://www.winona.edu/emergency/safety-levels.asp.

• The campus dashboard is updated weekly with reporting on positive cases and our quarantine and isolation protocol: https://www.winona.edu/emergency/dashboard.asp

• Our hope is that through mitigation strategies and personal preventative actions we can continue our semester as planned. We appreciate all the students who are actively working to control the spread of COVID-19: https://blogs.winona.edu/ready-for-you/count-on-me/
