

## MasterMold Quality Engineer: Johnson Creek

MasterMold, LLC, located in Johnson Creek, WI, is a certified ISO 9001 manufacturer of compression molded reinforced fiberglass composites including pre-form, sheet molding compound and bulk molding compound, with secondary operations in fabrication, assembly and Class A finished painting.

We have a thrilling opportunity for a Quality Engineer to assist our operations. This position will encompass the following duties:

- Assist with PPAP creation, Control Plans, FMEA's, Flows, etc
- Complete layouts utilizing a FaroArm
- Learn about the ISO 9001:2008 quality system and assist with creating new procedures and programs through our ISO 9001:2008 quality system.
- Assist in developing systems to improve productivity, efficiency and continual improvement throughout all plant operations and departments.
- Assist with in-process and final inspection ensuring that all parts are conforming to customer standards before shipment.
- Assist with monitoring employee quality performance through detailed inspections and quality data tracking.
- Assist with posting inspection data in different work cells around the plant to provide visual representation and goals to all employees with the data being tracked.
- Assist in implementing continual improvement suggestions in the assembly and final inspection work cells.

### Qualifications:

- Must be detailed with a good eye for inspection.
- Experience in GD&T, layouts, and FaroArm operation preferred.
- Must have aptitude to quickly learn the manufacturing flow and processes.
- Must be outgoing and willing to assist in all areas of manufacturing.
- Must be detailed with all administrative duties to ensure accuracy.
