

Do you enjoy shaping final products that will go to the customers? Would you like to lead production from A - Z in a safe and compliant way? Join our team! Carbon Core is looking for:

## General Production Manager (m/f)

### Responsibilities

Reporting directly to General Manager, as a general production manager, you'll oversee the production process, coordinating all production activities and operations. You'll need to:

- Plan and draw up a production schedule and product standards
- Decide on and order the resources that are required and ensure stock levels remain adequate
- Select equipment and take responsibility for its maintenance and repairing
- Set the quality standards and implement quality control program
- Ensure that the production is run-in cost-effective manner
- Monitor the production processes and adjust schedules as needed
- Liaise with different departments, teams and companies, e.g. suppliers, managers, clients
- Ensure that health and safety guidelines are followed at all times
- Ensure customer orders are completed on time and to budget and that quality standards and targets are met
- Collate and analyze data, putting together production reports
- Provide leadership and supervision for the production shift and associated personnel
- Effectively motivate, train and communicate with their teams to assure superior levels of safety, reliability, sanitation, and quality
- Insure individual and team levels of performance meet or exceed goals and expectations
- Be able to analytically and systematically troubleshoot manufacturing issues and develop the team to be self-directed in the same activities
- Maintain shift performance and quality documentation
- Participate in and lead project teams that improve safety, quality, reliability, sanitation and reduce waste.

### Qualifications

- Min 5 years experience in various manufacturing management roles
- Experience in CNC controlled machinery a plus
- Possesses the ability to work with groups of people with varying levels of education, expertise and backgrounds
- Excellent verbal and written communication skills
- Must be a self-starter and demonstrate ability to work with minimal supervision
- Planning and organization skills to be able run and monitor the production process
- Leadership skills to lead team in fast paced team environment and ability to achieve results through others
- The capacity to grasp complex concepts easily and understand basic mathematical concepts.
- Have attention to detail to ensure high levels of quality
- Strong negotiation skills for getting materials within budget at the right time
- The ability to work under pressure and multitask
- A results-driven approach to work
- the ability to work in a logical, systematic manner.

Date of start: As soon as possible

Reporting line: General Manager

## What The Position Offers You

We offer:

- competitive salary to commensurate with experience
- 401 K Plan
- Health Insurance
- Paid vacation
- Steep learning curve
- Freedom and empowerment in your role

Standard working time is 40 hours per week. The role may occasionally involve shift work or extended hours to meet deadlines or to introduce new systems.

## How to Apply

Interested applicants, please email cover letter, resume, and salary requirements on [jobs@sky-composites.com](mailto:jobs@sky-composites.com). The experience as Production Manager is advantage, but we will also welcome candidates with no direct PM experience, who are ready for new professional development and steep learning curve.

## About Carbon Core

Carbon-Core Corp. was founded in 2013 with a mission to focus on innovative new technologies with the best and most complete core materials selection in the industry.

We are guided by the principle that there is a beauty in finding things impossible to do and then doing them anyway. We do not want to fail, but we would feel worse about it if we did not even try. We have continuously challenged the traditional thought in core materials, and, succeeded, judging by the number of industry awards bestowed upon products incorporating our core materials technology. It is possible to obtain high strength, low weight, cost-effective core materials; it is also possible to obtain simultaneously high impact resistance, virtually zero water absorption, high dimensional thermal stability, sound and thermal insulation. It gives us the greatest pleasure to present the CarbonCore Portfolio of Core Materials, and other associated products and services offered by Carbon-Core Corporation.
