

## ***2018 Lake Winona: Natural History and Modern Ecology***

The Senior University course *Lake Winona: Natural History and Modern Ecology* starts Wednesday, June 6th at 10:00 a.m. This class runs each Wednesday (except July 4th) through July 18th from 10:00 a.m. – Noon. The first class period will be held in the Science Laboratory Center, Room 137. Most subsequent class periods will be held outdoors off-campus, but we do have this room booked for the entirety of the course in case of inclement weather, etc.

Street parking is easy to find near the WSU campus over the summer,

This course is being co-taught by Jennifer Biederman and Dylan Blumentri\_. Jennifer is an assistant professor in the Biology Department at Winona State and Dylan is an assistant professor in the Geoscience Department. They are both very excited about teaching this course. I'm sure it's going to be a great class!!
