*Whereas*, transgender men still have periods,

*Whereas*, the bathroom should be a comfortable space for everyone,

*Whereas*, the anxiety of using menstrual products and not being able to dispose of them secretly can be uncomfortable,

*Whereas*, sanitary trash cans and accessible menstrual products being available will be helpful with that anxiety,

*Whereas*, most of the transgender community is in low economic status,

*Whereas*, having these sanitary trash cans will break the stigma of periods,

*Therefore be it resolved*, WSUSS recommends Winona State University installs sanitary trash cans and menstrual products in all men's restrooms on campus by the end of Spring Semester 2022.
