Schedule is subject to change based on sufficient enrollment and faculty resources.

An elective for use in any Doctor of Nursing Practice program is “any graduate level course (3 credits preferred) that the graduate advisor approves” (*GC: November 10, 2014*)

In addition to the courses listed above, students may consider courses in other graduate programs as electives if the elective supports the student’s plan of study. Students propose electives in consultation with their advisor and the course instructor.
